

Fee Schedule

How does Sugarcane Capital make money on foreign exchange contracts?

The rate which we offer you is different to the rate we are able to obtain from the wholesale market. Accordingly, we make profits from selling you the currency at a marked up price.

Please find below our default markup rates which is converted and added into the spread to provide an all-in rate.

Traded Amount	Charge
Under £10k	Flat fee £100
£10k - £50k	1%
£50k - £100k	0.5%
£100k - £500k	0.4%
£500k+	0.3%

These rates are subject to change and are provided as a guide for one of transactions. If you are a frequent buyer of different currencies, we can offer volume-based discounts on request.

Are there any further fees?

Yes, these fees relate to payments and administration costs. We charge these to offset the charges we incur in executing the payments and to cover our own costs in carrying out administrative tasks.

We charge between £10 - £20 for making a payment depending upon which currency is being used and the amount.
